

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Appln. No. 10/601,768

AMENDMENTS TO THE SPECIFICATION

Please replace the first full paragraph on page 19 with the following amended paragraph:

The distal ends of the convex portions 51 are formed in substantial arc-shapes in side cross-sectional view (side view). Projections (not illustrated), which are substantially arc-shaped in plan view or substantially triangular in plan view, project at both side surfaces of the convex portion 51 along the entire height of the convex portion 51. Accordingly, when the convex portions 51 are inserted between the guide wall portions 42 and slide, only the substantially arc-shaped distal ends of the convex portions 51 contact the inner ceiling surface of the upper case 16 and the inner bottom surface of the lower case 18, such that there is linear contact thereat. Only the distal ends of the projections 51A, which are substantially arc-shaped or the like, contact the mutually opposing guide surfaces of the guide wall portions 42, such that there is linear contact thereat.
